If you need further assistance, see the [Help & FAQs on pdfs](#).

Instructions

Use the framework below to come to an evidence-based practice decision about the use of embedded interventions for Luke. Summarize sources of evidence, consider that evidence in light of different perspectives and contexts, and make a recommendation for the answerable question you posed in Step 2.

1. Summarize Step 3: Evidence

- a. List the major points from [Handout 1.3: Research Summary on Embedded Interventions](#) to summarize the best available research on embedded interventions:

- b. List the major points from [C: Policies](#) reflecting the field's views on embedded interventions:

Activity 1.13a

- c. List the major points from the families on embedded interventions in [D: Experience-Based Knowledge](#):

2. Consider the context

Summarize your answers from [Activity 1.12a: Consider the unique contexts](#).

3. Integrate the evidence and context to make a decision

Recall the answerable question: *For children like Luke, who have developmental delays (P), are embedded interventions (I) effective in promoting learning in the areas of communication and social development (O)?*

Weigh the evidence in light of the context to come to a decision. What is your recommendation? Be prepared to discuss.
